- Blockchain and Bitcoin Fundamentals

Ali Joseph Saleh

Full-stack developer passionate about building web and mobile applications. Graduate in secure application development and finance. Rigorous, organized and detail-oriented.

TECHNICAL SKILLS

- Backend: ASP.NET Core (C#, REST API)
- Databases: SQL Server, PostgreSQL
- Git & GitHub
- Microsoft Office (Word, Excel, PowerPoint)
- Frontend: React, Next.js, TypeScript
- Python for automation
- Linux (Bash scripting)

PROFESSIONAL EXPERIENCE

- Full-Stack Developer / Freelance Experience** Mar. 2025 - Mar. 2026
- DevX Applications** Sep. 2025 - Mar. 2026
 - Developed an internal administration web application with Next.js for managing and tracking industrial operations.
 - Developed a mobile application with React Native allowing operators to monitor the status of several dozen industrial machines in real time.
 - AI Batoul Market** Nov. 2025 - Dec. 2025
 - Developed a Next.js showcase website with integrated SEO, featuring a catalog of 37 products organized across 5 categories.
 - Designed an administration panel (CRUD) to manage products (Prisma ORM) with automated deployment via GitHub (CI/CD).
 - Swiss Enterprise** May 2025 - Jun. 2025
 - Designed with React + ASP.NET Core Web API, then migrated to a full-stack Next.js + TypeScript + Drizzle ORM architecture with integrated SEO for a retail company.
 - Order management via a dedicated admin panel, CI/CD deployment via GitHub, and improved mobile performance thanks to SSR.
 - KidNest** Mar. 2025 - May 2025
 - Developed a complete solution with ASP.NET Core MVC and Bootstrap to expose a client's physical inventory online.
 - Real-time product synchronization, user authentication, and inventory management via an admin interface.

- Teaching Assistant (Contract) / Cégep Limoilou** - Québec, Canada Oct. 2024 - Jan. 2025
- Led classroom assistance sessions to clarify object-oriented programming concepts, adapting explanations to individual student needs.
 - Provided personalized tutoring outside of class to struggling students, deepening key topics (web development, OOP) through targeted practical exercises.

- Software Developer (Contract) / ACEF de Québec** - Québec, Canada Jun. 2024 - Oct. 2024
- Development and maintenance of the internal management system; operational data entry and analysis, and analytical dashboards.
 - Tools used: Visual Studio 2022, .NET 6, ASP.NET MVC, C#, SQL Server, Entity Framework Core, Git / Jira / Scrum.

- Technical Support / Z Security** - Ireland Feb. 2019 - Mar. 2020
- Used Linux environments to conduct and support practical cybersecurity and penetration testing labs.
 - Provided technical support to students by answering questions related to cybersecurity exercises and tools.

EDUCATION

- AEC in Secure Application Development** Oct. 2022 - Oct. 2024
Cégep Limoilou, Québec, Canada
- Master 2 in Management** 2017 - 2019
Université Saint-Joseph, Beirut, Lebanon
- Bachelor's in Business Administration** 2014 - 2017
